

## **After a participant is done**

1. Log out of the participant's account, and log back in as lupyranlab.
2. Navigate to the experiment directory, and run the stop.py script.

```
cd ~/experiments/one-two-test  
pipenv shell  
python stop.py -u [username] -l [language]
```

1. Turn off the keylogger.

To turn the keylogger off, open a terminal window (Ctrl+Alt+t) and enter the following command:

```
llkk
```
